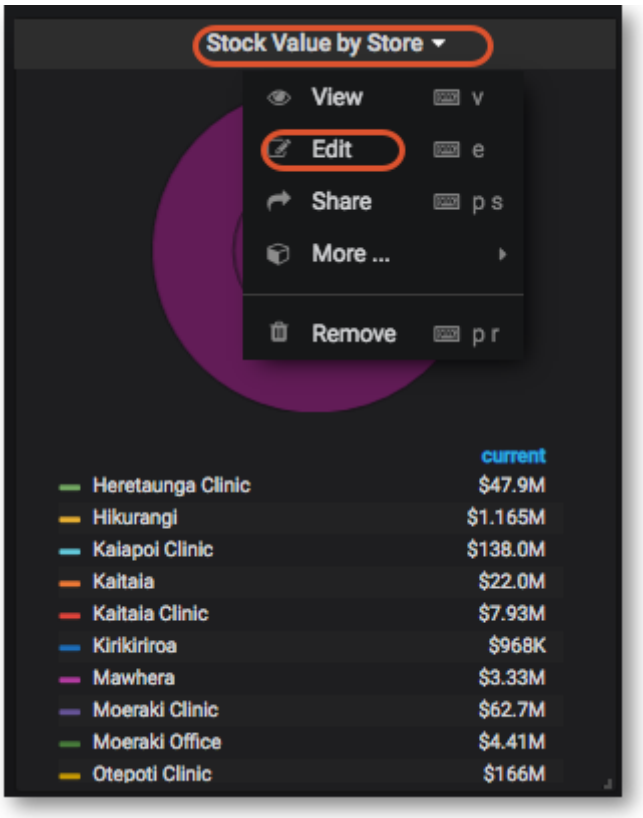
Panels

There are several different Panel types or visualizations you can have on your dashboard.

For instructions on how to configure each type of Panel click here:

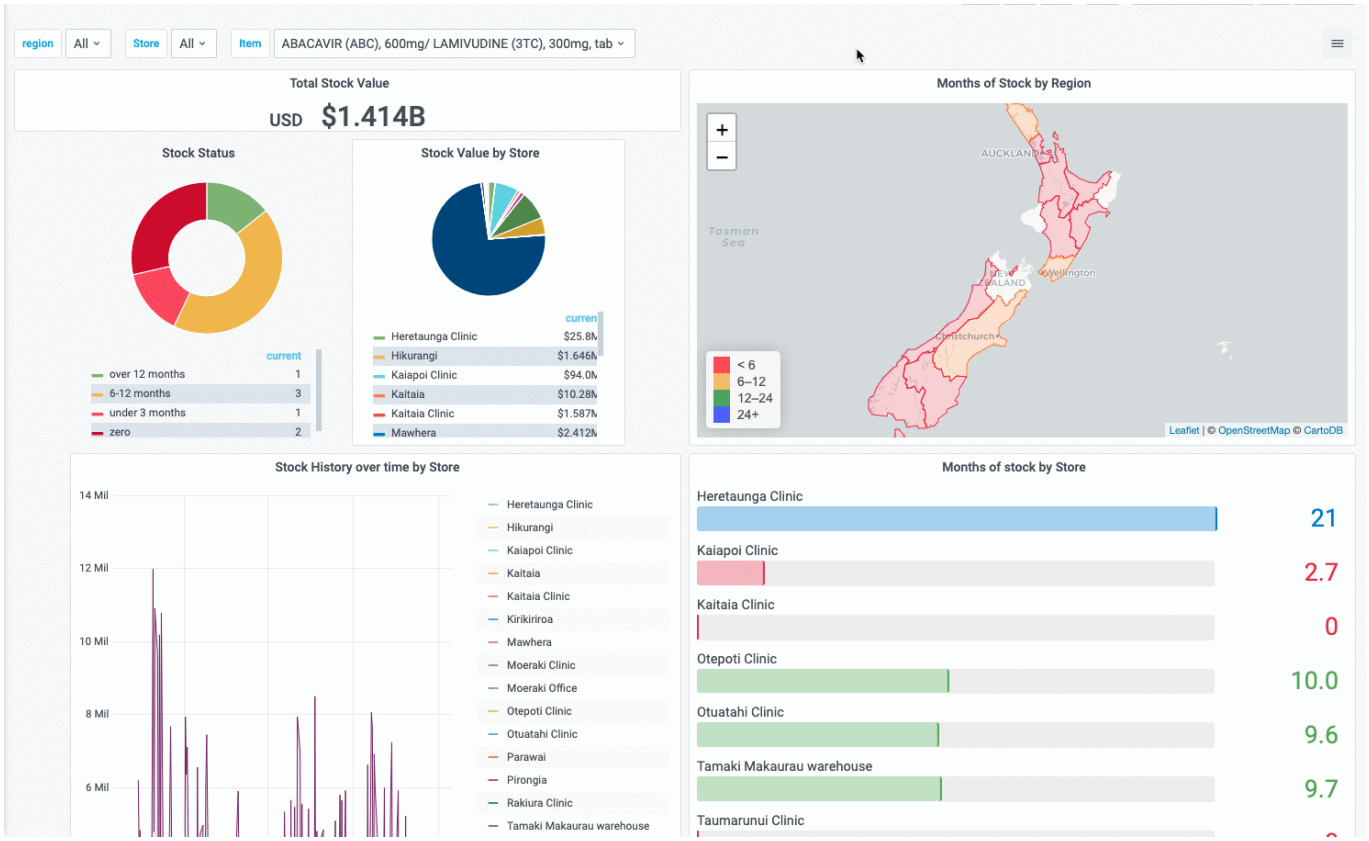
- Grafana Graphs
- Grafa Singlestats
- Grafana Tables
- Grafana Dash Lists
- Grafana Text
- mSupply Region Map (see below)
- mSupply Table (see below)
- mSupply World Map (see below)

Clicking the title for a panel exposes a menu. The **Edit** option opens additional configuration options for the panel.

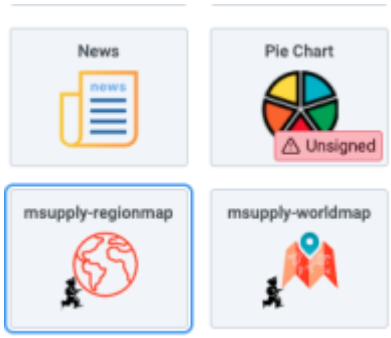


mSupply Region Map

This is a custom panel which will need to be installed on your server. Contact mSupply support if this panel is not available to you.
The region map displays a value and a geographic outline on a map, and allows you to set the colour thresholds for each region. This gives a quick visualisation of geographical data.
Additionally, you can define clickable actions to update filter values based on the region selected, as shown



To use, select the msupply-regionmap visualisation option:



There are a number of options available in the **Display** section:

- **Centre** the latitude and longitude of the centre of the map
- **Initial Zoom** a numerical value for the initial zoom level of the map. Higher values are more zoomed in
- **Show Legend** toggles the display of a tooltip on mouse over
- **Mouse Wheel Zoom** toggles the ability to zoom the map using the mouse wheel
- **Label template** specifies a custom format for the tooltip. Use ${name} for the name field, ${value} for the numerical value and ${unit} for the unit field (if used)
- **Linked Variable**
