# 6. Reviewing the setup

6.01. Check the store is working via mSupply Desktop

- On the Primary server, log in to the new Store.
  If you are already logged in to mSupply Desktop you can switch to the new Store via the **File**

  menu > Switch

- Check that the correct Items/Master List(s) are visible

6.02. Start the web server

Remember: the syncing of the store only works when the [web server](#) is running!
