

Setting up mSupply Mobile - on the Server

The following details the steps of setting up mSupply from your organisation's mSupply Server

Note - the mSupply Support Team will complete these steps for

The following instructions are for your information only.

As of 2019-10-24, this process is largely manual, with sync sites and stores needing to be created by an operator, one-by-one with a few small bits of code to make some of these processes guicker and more reliable. There is a plan to develop a tool by which virtually all of the process can be automated. Even with such a tool, at least the following information will need to be provided manually:

- Store name
- Customer name from which the store is being created (normally the case)
- Item master list controlling visibility for the store
- 1. Where to start
- 2. Create Sync Site
- 3. Create the Store
- 4. Configuring the Store and Dispensing
- 5. Setting up the Users to access the store
- 6. Reviewing the setup
- 7. Setting up the mSupply Mobile app dashboard
