

Setting up mSupply Mobile - the Server

The following details the steps of setting up mSupply from your organisation's mSupply Server

Note - the [mSupply Support Team](#) will complete these steps for you.

The following instructions are for your information only.

As of 2019-10-24, the Store setup process is largely manual, with sync sites and stores needing to be created by an operator, one-by-one, with a few small bits of code to make some of the processes quicker and more reliable.

There is a plan to develop a tool where most of this process will be automated.

Whether the Store is set up manual or automated the following information will need to be provided:

- Store name
- Existing customer name that the store is being created for (as is normally the case)
- The item master list to be attached to the store

- [1. Where to start](#)
- [2. Create Sync Site](#)
- [3. Create the Store](#)
- [4. Configuring the Store and Dispensing](#)
- [5. Setting up the Users to access the store](#)
- [6. Reviewing the setup](#)
- [7. Setting up the mSupply Mobile app dashboard](#)
