

mSupply Mobile Demo

We now have a server setup for users to try out the mSupply mobile application.

Firstly, download and install the mobile app from here: [Mobile App](#)

The mSupply Mobile demo site is now hosted on: <https://demo.msupply.org>

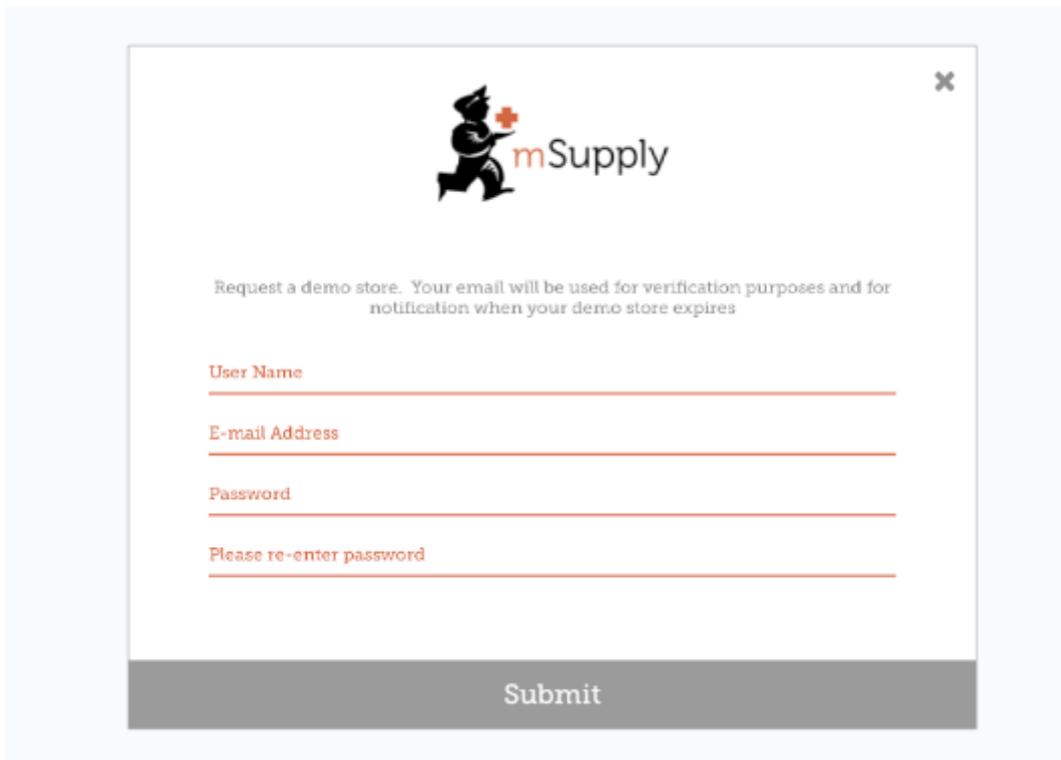

Request a Demo Store

The screenshot displays the mSupply mobile application's 'Connect' screen. At the top, the mSupply logo is visible. Below the logo, there are three input fields with red text labels: 'Primary Server URL', 'Sync Site Name', and 'Sync Site Password'. Each field is followed by a red horizontal line. Below the input fields, there is a cloud icon, an equals sign, and a Wi-Fi icon. A grey bar at the bottom of the input section contains the word 'Connect' in white text. Below this bar, there are two orange buttons with white text: 'Request a Demo Store' and 'Import Data'. At the bottom center of the screen, the version number 'v811' is displayed.

After starting mSupply mobile on the Android tablet, you will see a screen like the above for the first time. Click on the “Request a Demo Store” button to request credentials for the new store.

Enter your details

On the above screen a unique user name, a valid e-mail address and password are required. Please note down the password as this will be needed later. Our mSupply mobile username and password guidelines are available [here](#)

Check your e-mail

The mSupply Demo server will e-mail you and expect you to click the link to activate your Mobile store.

Please check your junk e-mail if you do not see the e-mail.

Setup your Mobile Store

You should now be able to setup your store.

- Your store name will be in the format: `UserName_store`. Note that the demo server adds the “_store” to signify store setup.
- The password for the store credential will be in the format: “`UserName_store_Site`”. Note the capital letter in the text “Site”.
- The URL must be: <https://demo.msupply.org>

If the credential of your mobile store has been entered properly then your table will start to retrieve data from Demo server. Please wait until the procedure is finished. We expect this to take no more than 5 minutes.

Login as a User

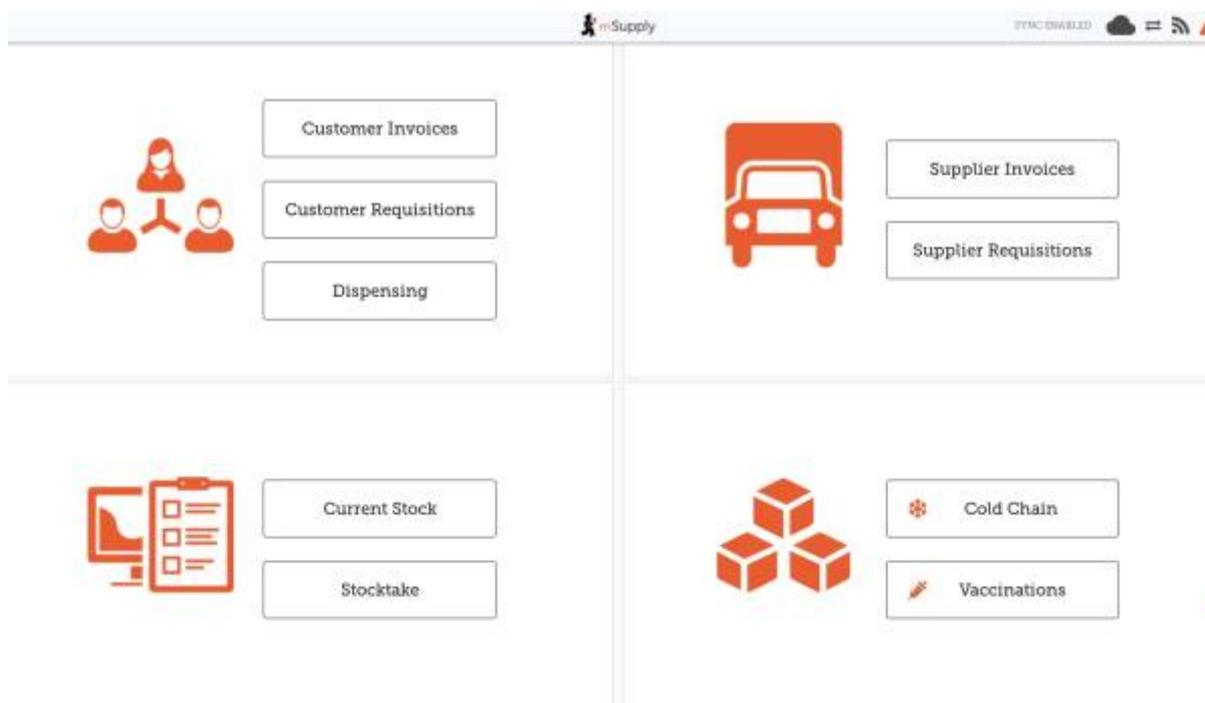

You may log in as a user once the store setup has been completed. You will be shown a login window.

- This time the user name is what you initially typed. So just UserName.
- Password is what you originally typed when requesting a Demo site.

Using the module

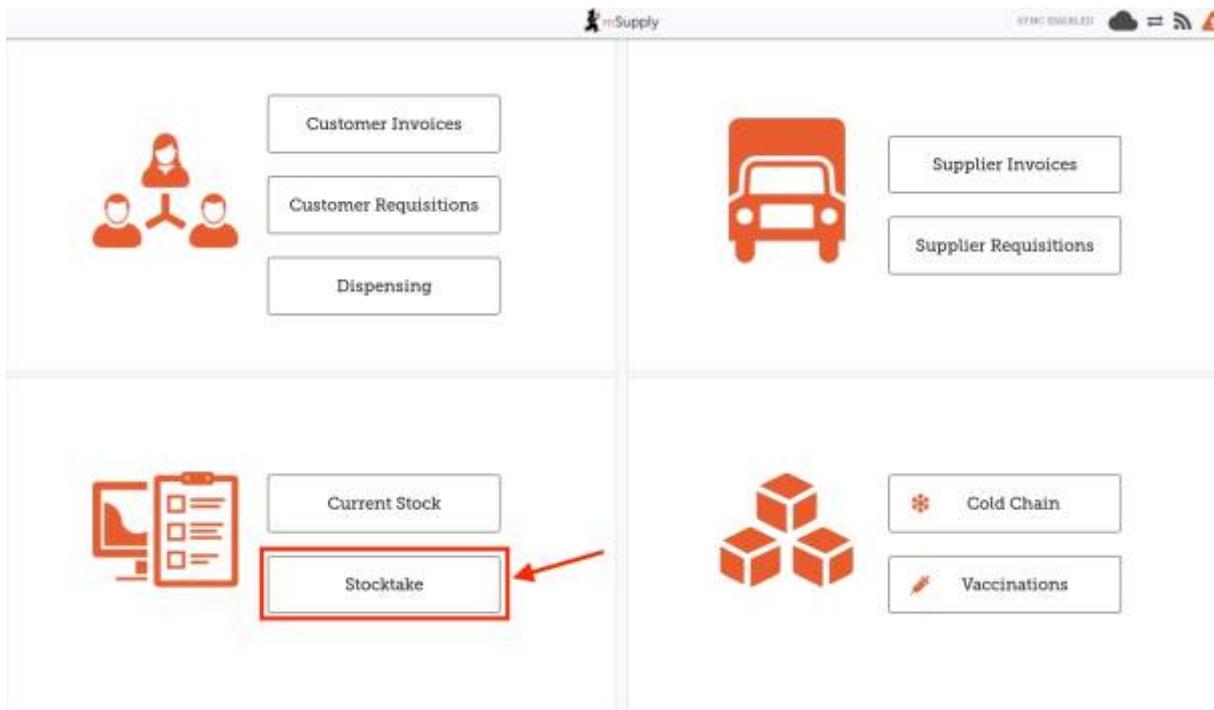

Once setup is complete, you'll end up with a mobile navigation screen that looks like this:

Vaccination module

To use **Vaccination** module, you must carry out a stock take:

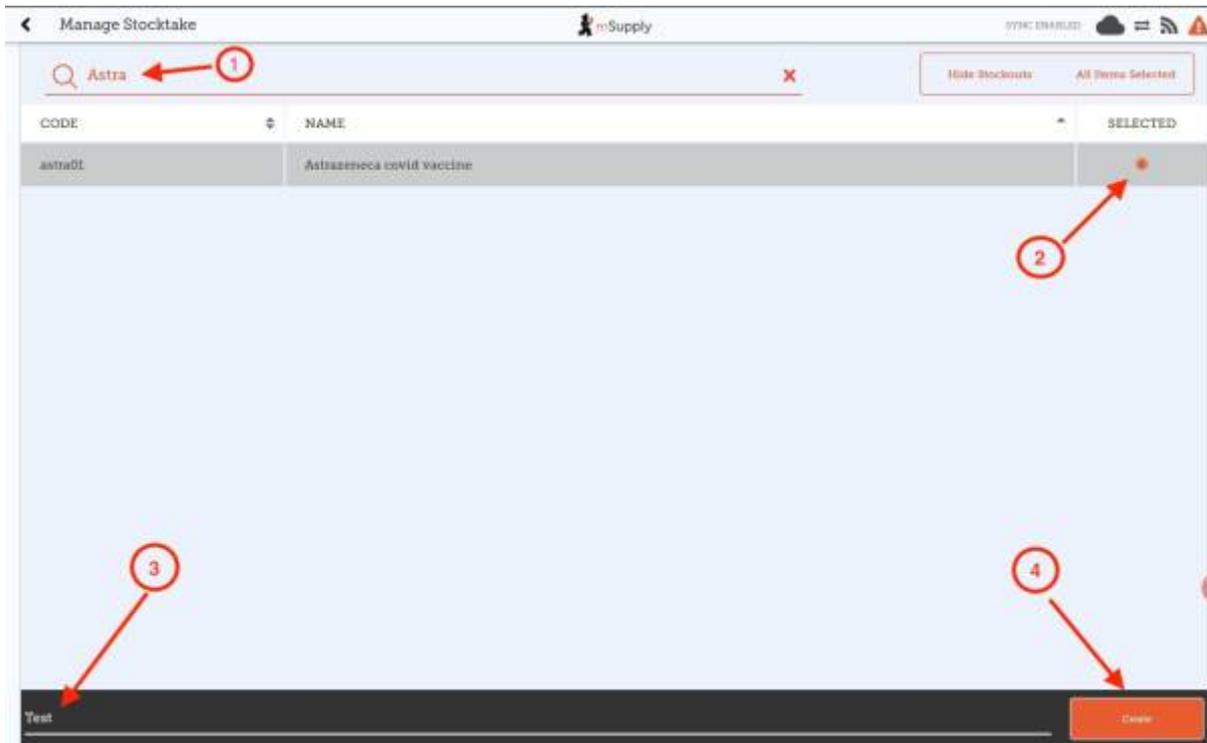

- Click on **Stocktake**

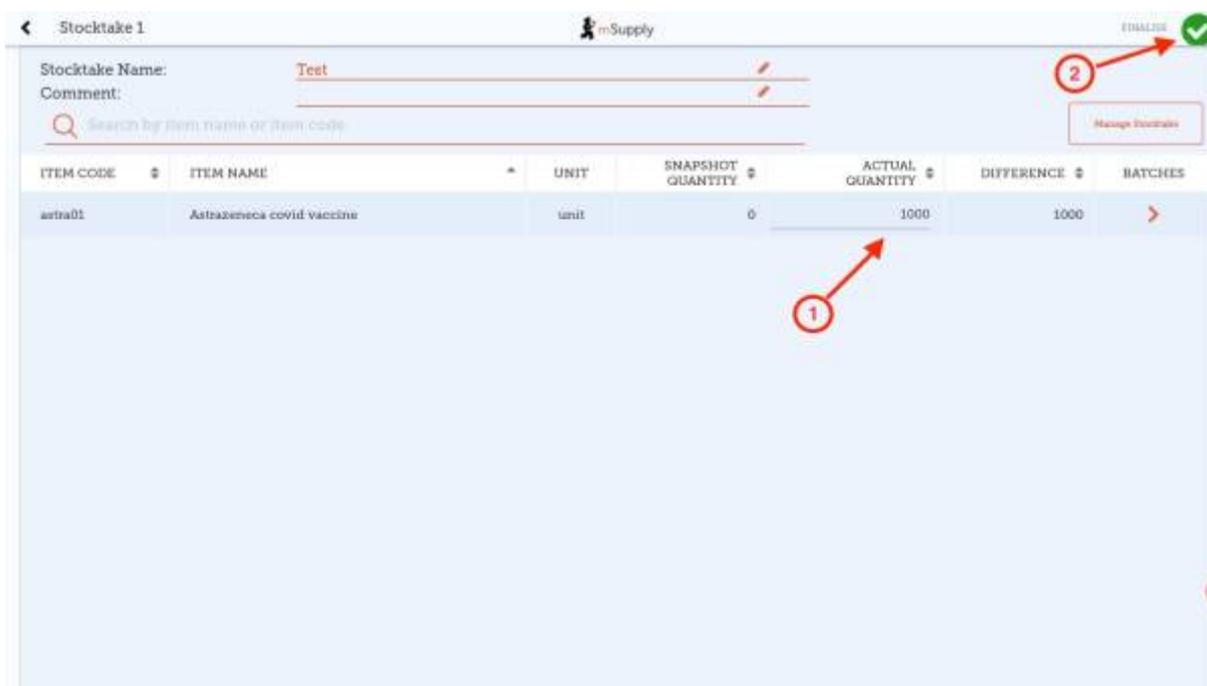

- Create a New Stocktake by clicking on **New Stocktake** button.

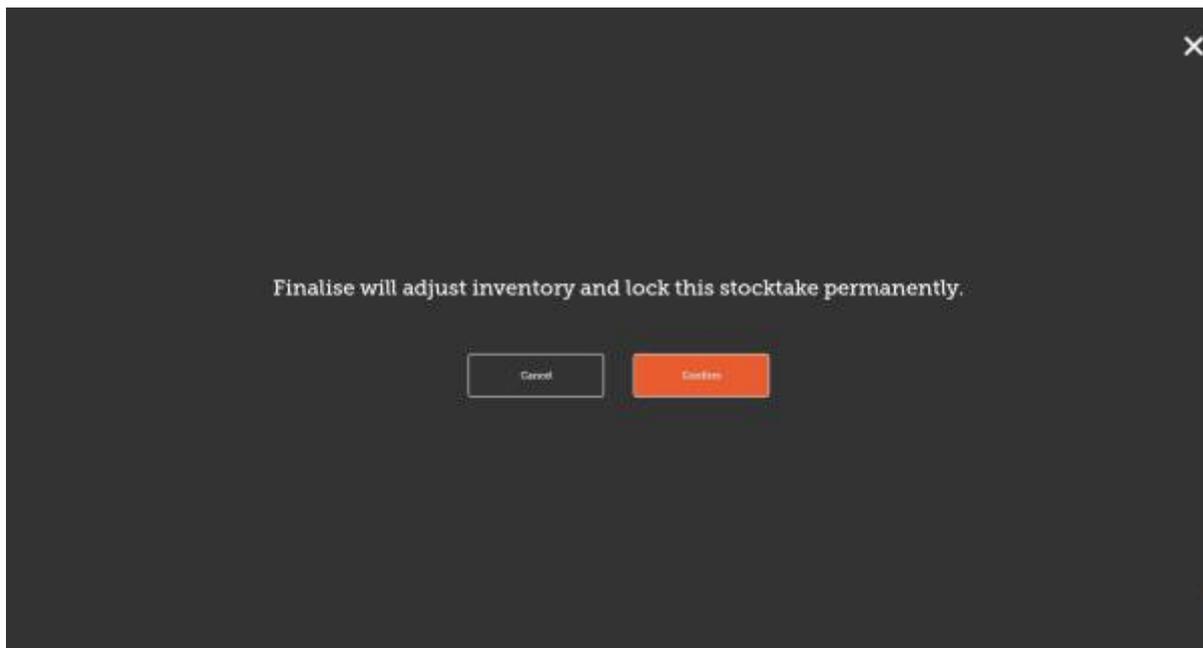

- Search item **Astrazeneca covid vaccine** from the list, select it.
- Give your stocktake a name at the bottom and click on **“Create”** button.

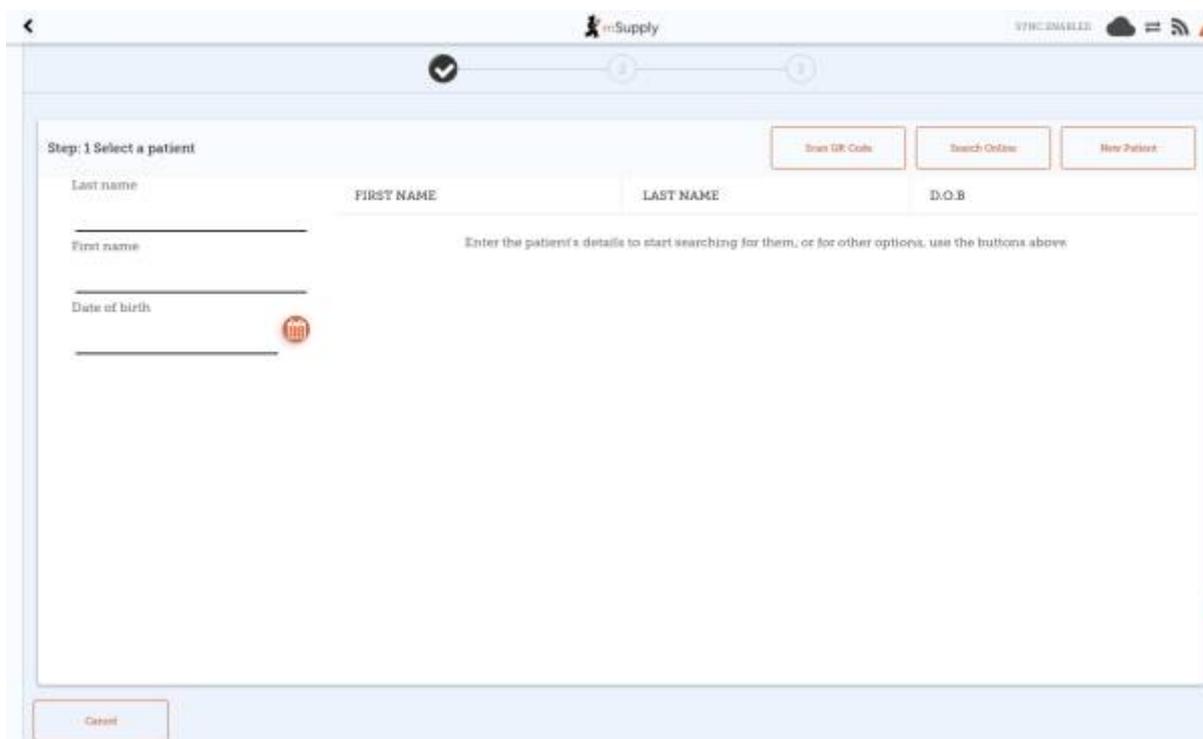

- Enter any value(greater than 0) in **Actual Quantity** field and hit the **FINALISE** icon.

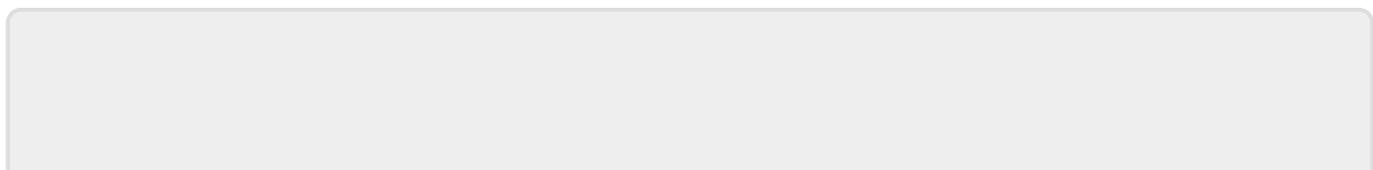

- “Finalise will adjust inventory and lock this stocktake permanently”, Click on **Confirm** button.

- Go back to navigation screen and click on **Vaccinations** module.
- Now **Vaccinations** module is enabled and you should be able to see Search Patient lookup window as first step.

Good luck, you may now search a patient and carry out a vaccinations.
