

mSupply Mobile Demo

We now have a server setup for users to try out the mSupply mobile application.

Firstly, download and install the mobile app from here: [Mobile App](#)

The mSupply Mobile demo site is now hosted on: <https://demo.msupply.org>

Request a Demo Store

The image shows the mSupply mobile application interface. At the top, there is a logo featuring a stylized figure holding a cross, followed by the text 'mSupply'. Below the logo, there are three input fields with red text labels: 'Primary Server URL', 'Sync Site Name', and 'Sync Site Password'. Each field has a red underline. Below these fields is a grey bar with a cloud icon, an equals sign, and a Wi-Fi icon, followed by the text 'Connect'. At the bottom, there are two orange buttons with white text: 'Request a Demo Store' and 'Import Data'. Below the buttons, the version number 'v811' is displayed.

After starting mSupply mobile on the Android tablet, you will see a screen like the above for the first time. Click on the “Request a Demo Store” button to request credentials for the new store.

Enter your details

A screenshot of the mSupply mobile app registration screen. At the top, there is a logo featuring a stylized figure holding a cross, followed by the text 'mSupply'. Below the logo, a message reads: 'Request a demo store. Your email will be used for verification purposes and for notification when your demo store expires'. There are four input fields with red labels: 'User Name', 'E-mail Address', 'Password', and 'Please re-enter password'. Each field has a red underline. At the bottom, there is a grey 'Submit' button. A small 'x' icon is in the top right corner of the form area.

On the above screen a unique user name, a valid e-mail address and password are required. Please note down the password as this will be needed later. Our mSupply mobile username and password guidelines are available [here](#)

Check your e-mail

The mSupply Demo server will e-mail you and expect you to click the link to activate your Mobile store.

Please check your junk e-mail if you do not see the e-mail.

Setup your Mobile Store

You should now be able to setup your store.

- Your store name will be in the format: Username_store. Note that the demo server adds the "_store" to signify store setup.
- The password for the store credential will be in the format: "Username_store_Site". Note the capital letter in the text "Site".
- The URL must be: <https://demo.msupply.org>

If the credential of your mobile store has been entered properly then your table will start to retrieve data from Demo server. Please wait until the procedure is finished. We expect this to take no more than 5 minutes.

Login as a User

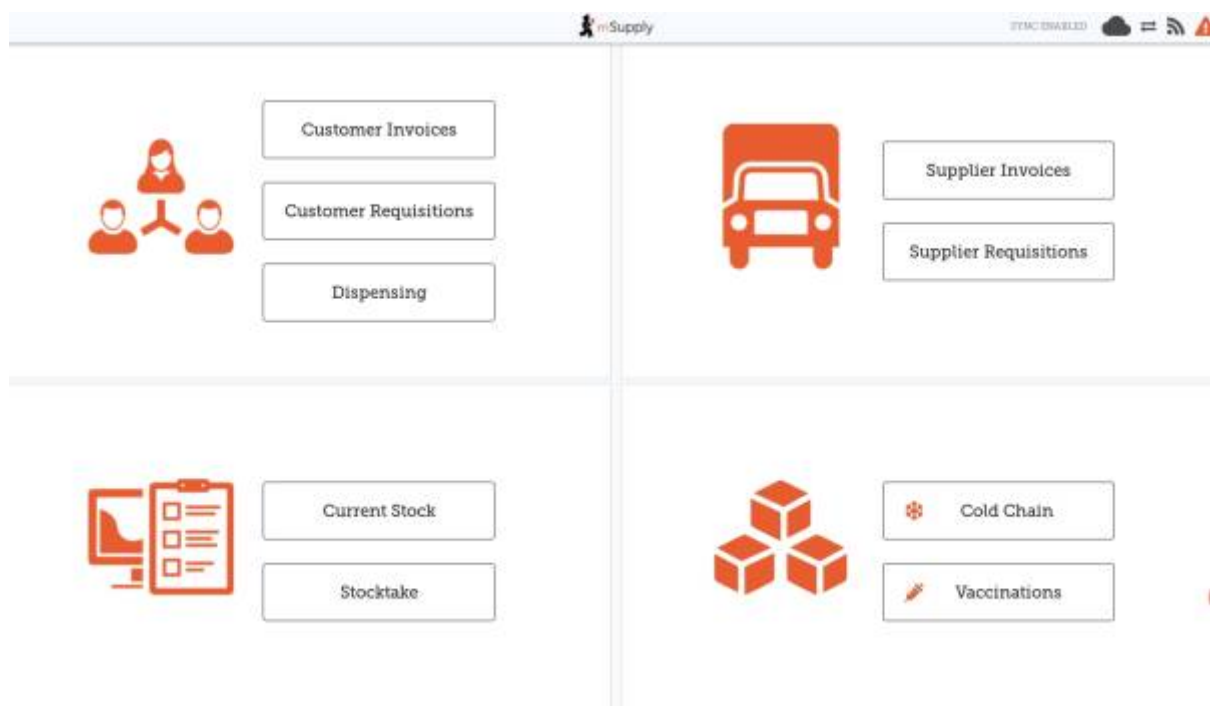

You may log in as a user once the store setup has been completed. You will be shown a login window.

- This time the user name is what you initially typed. So just UserName.
- Password is what you originally typed when requesting a Demo site.

Using the module

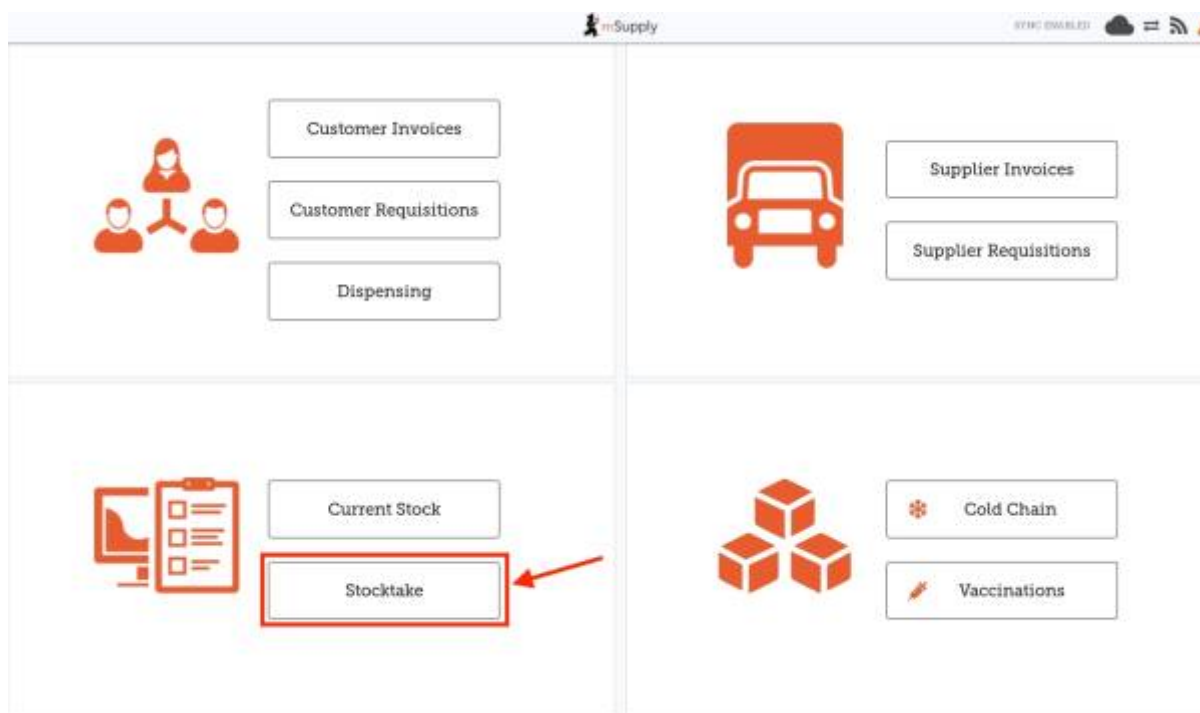

Once setup is complete, you'll end up with a mobile navigation screen that looks like this:

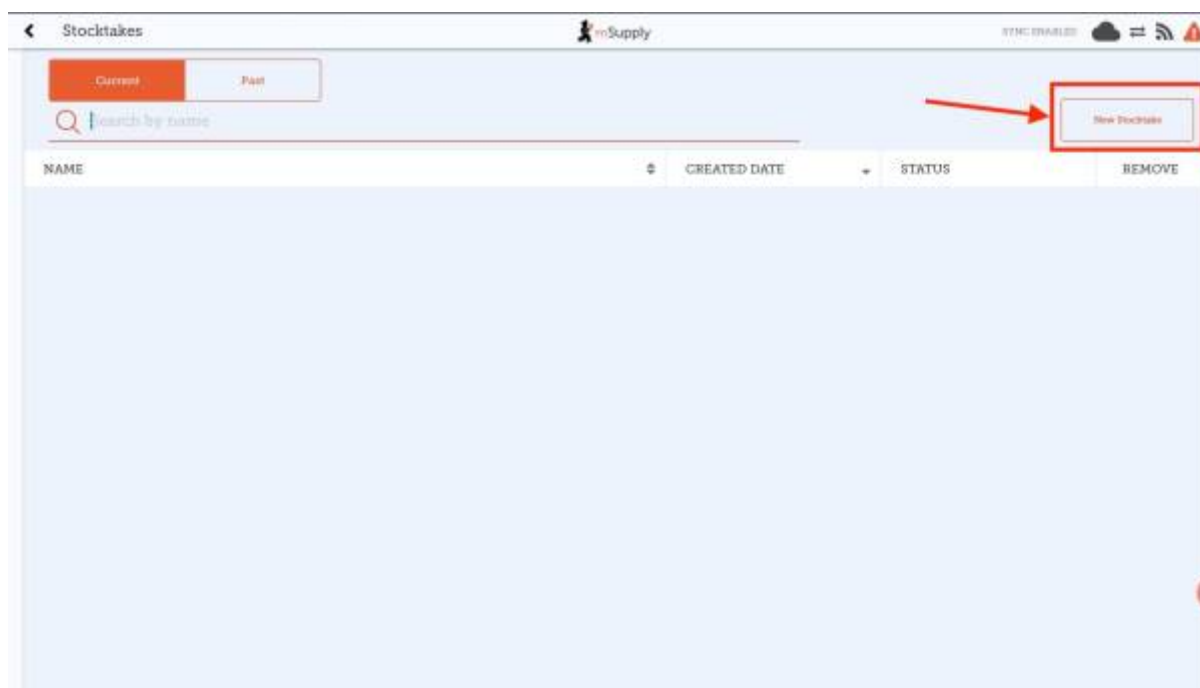

Vaccination module

To use **Vaccination** module, you must carry out a stock take in order to add some stock. The vaccination module only works when you have stock.

- Click on **Stocktake**

- Create a New Stocktake by clicking on **New Stocktake** button.

- Search item **Astrazeneca covid vaccine** from the list, select it.
- Give your stocktake a name at the bottom and click on **Create** button.

Manage Stocktake

Search: Astra

CODE	NAME	SELECTED
astra01	AstraZeneca covid vaccine	<input checked="" type="checkbox"/>

Test

Create

- Enter any value(greater than 0) in **Actual Quantity** field and hit the **FINALISE** icon.

Stocktake 1

Stocktake Name: Test

Comment:

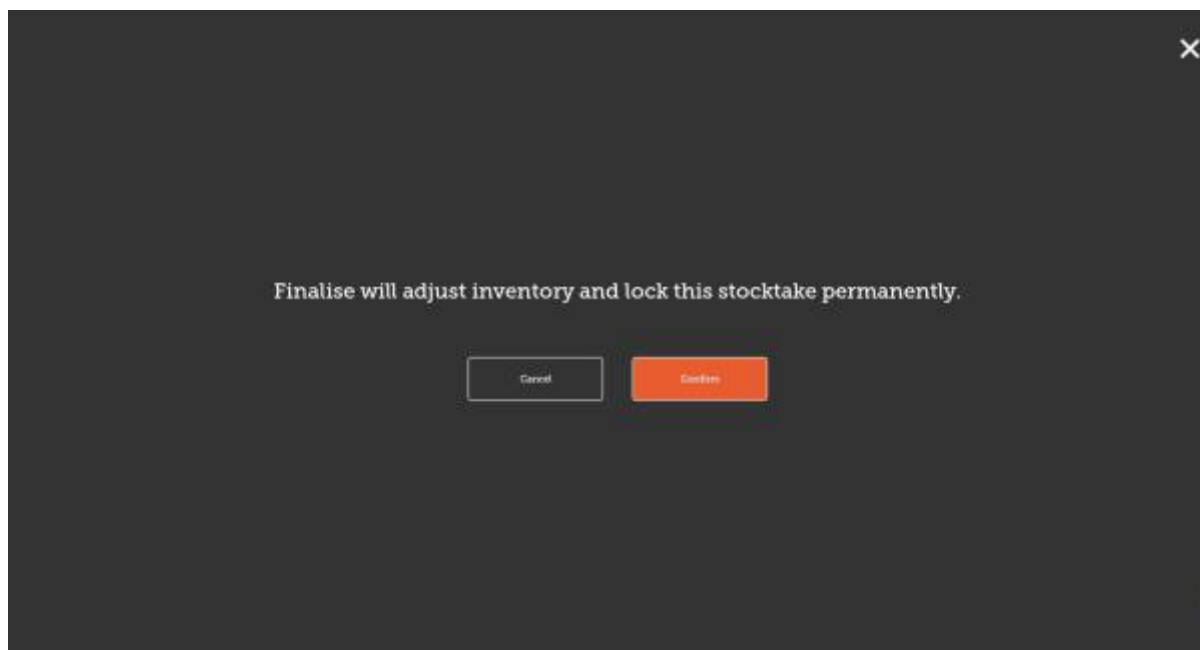

Search by item name or item code

ITEM CODE	ITEM NAME	UNIT	SNAPSHOT QUANTITY	ACTUAL QUANTITY	DIFFERENCE	BATCHES
astra01	AstraZeneca covid vaccine	unit	0	1000	1000	>

FINALISE

Manage Stocktake

- “Finalise will adjust inventory and lock this stocktake permanently”, Click on **Confirm** button.

- Go back to navigation screen and click on **Vaccinations** module.
- Now **Vaccinations** module is enabled and you should be able to see Search Patient lookup window as first step.

Good luck, you may now search a patient and carry out a vaccinations.
