Setting up mSupply Mobile - the Server

💡 The following details the steps of setting up mSupply from your organisation's mSupply Server

Note - the mSupply Support Team will complete these steps for you.
The following instructions are for your information only.

ℹ️ As of 2019-10-24, the Store setup process is largely manual, with sync sites and stores needing to be created by an operator, one-by-one, with a few small bits of code to make some of the processes quicker and more reliable.
There is a plan to develop a tool where most of this process will be automated.

Whether the Store is set up manual or automated the following information will need to be provided:

- Store name
- Existing customer name that the store is being created for (as is normally the case)
- The item master list to be attached to the store
